企业简介 COMPANY PROFILE

公司创建于 1986 年，专注铜加工产业 40 年，是全球领先的铜合金及先进材料制造企业。主要产品有铜管、棒、线、板、带、排、电磁线、阀门、磁性材料及黄铜、青铜、紫铜、白铜等高端合金。致力于为新能源汽车、风力发电、光伏能源、电力电气、轨道交通、消费电子等产业发展提供全球一流的产品和服务。

公司立足宁波，放眼世界，在全球有 9 大生产基地，8000 余名员工。在美国、德国、日本、韩国、泰国、新加坡，中国香港等地设立分支机构，业务遍及 100 多个国家和地区，是众多世界知名企业的长期合作伙伴。

2025 年，铜加工产量达 190+ 万吨，营收总额 1500+ 亿元，位列中国制造业 500 强第 88 位。

Jintian was founded in 1986 and focus on copper processing industry for 40 years, which is a global leader in the manufacturing of copper alloys and advanced materials. Our main products include copper tube, rod, wire, plate, strip, busbar, electromagnetic wire, valve, magnetic materials and high-end alloys such as brass, bronze, copper and copper nickel. We are committed to providing global first-class products and services for the development of new energy vehicles, wind power generation, photovoltaic energy, electric power, rail transit, consumer electronics and other industries.

Jintian is based in Ningbo, has nine production bases, and more than 8,000 employees in the world. We have set up subsidiaries in USA, Germany, Japan, Korea, Thailand, Singapore, Hong Kong China etc. Our business covers more than 100 countries and regions, and we are the long-term partner of many world famous enterprises.

In 2025, copper processing output reached 1.90+ million tons, the total revenue is reaching 150+ billion RMB, and ranked 88 in Chinese top 500 manufacturing industries.

技术研发 TECHNOLOGY R&D

以科技创新为主线，公司先后设立了“国家级企业技术中心”、“国家级博士后科研工作站”及国家实验室认可检测中心；以“全球科技人才为我所用”的理念，聘用德国、日本、韩国等国际高端技术人才和持续深化与中南大学、大连理工大学、中科院宁波材料所、浙江大学等国内著名科研机构的合作；坚持“创新产品、精准开发”的道路，导入并持续优化IPD（集成产品开发）流程，建立了以市场为导向、产学研用紧密融合的企业技术创新体系。

With scientific and technological innovation as the main line, Jintian has set up "National Enterprise Technology Center", "National Post-doctoral Research Station" and National Laboratory accredited testing center. With the concept of "global scientific and technological talents contribute to our company", we employ international high-end technical talents from Germany, Japan and Korea, and continue to deepen cooperation with famous domestic scientific research institutions such as CSU, DUT, ZJU and Ningbo Material Institute of CAS. We insist on the road of "innovative products and precisedevelopment", introduce and continuously optimize the IPD (Integrated Product Development) process, and established a market-oriented enterprise technology innovation system with close integration of production, academia, research and application.

精益生产 LEAN PRODUCTION

围绕“精益到底，智能为先”的生产理念，全面推行精细化管理，引进多名世界500强企业资深外籍专家，借力国内一流咨询机构，通过推行精益六西格玛、QC活动、全员提案改善等，持续优化工业布局、促进产销协同、提升设备效能、改善员工作业，形成了具有金田特色的精益创新体系，使公司在产品质量、生产成本、劳动效率、现场管理等方面确立了行业领先优势。

Jintian Copper relies on the production concept of "lean production, intelligence first" and comprehensive implementation of lean management. With the help of several senior foreign experts from Fortune 500 companies and the use of domestic first-class consulting institutions, as well as through the implementation of lean six sigma, QC activities and employee proposals, Jintian Copper continues to optimize its industrial layout, promote the coordination of production and sales, improve the efficiency of equipment and improve the work of employees. This forms a lean innovation system with characteristics unique to Jintian. These efforts have enabled the company to establish industry-leading advantages in product quality, production costs, labor efficiency and on-site management.

智能制造 INTELLIGENT MANUFACTURING

公司坚持将智能化作为企业转型的重要抓手，成立智能制造研究院，先后与BCG、IBM、HP、SAP、Honeywell等国际一流咨询与服务公司合作,以提升企业核心竞争力为目标，依托工业设计理念，以精益体系为基础，深度运用自动化、信息化、数字化、智能化等技术，实现数据驱动的行业智能制造新模式。

Jintian Copper insists on taking intelligence as an important grasp of corporate transformation, establishes the Intelligent Manufacturing Research Institute, and cooperates with BCG, IBM, HP, SAP, Honeywell and other international first-class consulting and service companies. With the goal of improving the core competitiveness of corporates, relying on the concept of industrial design, lean system as the basis, in-depth use of automation, information technology, digitalization, intelligence and other technologies to achieve a new mode of data-driven industry intelligent manufacturing.
